

# A Guide to Successful Account Binding

## 1 Choose your Account Manager

Before anyone adds a ticket to Apple Wallet, your group needs to designate one person as the **Account Manager**.

- Buy tickets for The Fabulous Fox Events
- Be the first to add tickets from this account to their Apple Wallet
- Permanently bind their The Fabulous Fox ticketing account to their personal Apple Account
- Manage all official ticket transfers to group members who need their own ticket to enter

### Choose Your Manager Carefully

The first person to add a ticket from your The Fabulous Fox account to Apple Wallet permanently binds that account to their Apple Account. All future tickets from that account must either go to the same Apple Wallet or be officially transferred.

### Only Use My Account

To send a ticket to someone, use the My Account transfer feature in The Fabulous Fox website. Sharing logins, forwarding "add to wallet" emails, or using screenshots will not work for entry.

## 2 Identify Your Dynamic

### Solo

- You're the *Account Manager*!
- Purchase and add your ticket directly to your Apple Wallet
- Transfer or sell your ticket through your My Account page only

### Duos

- *Account Manager* purchases and adds the first ticket to their Apple Wallet
- Transfer ticket to partner if not entering the event together
- Do not share logins (even if you share everything else)

### Families or Larger Groups

- Designate one tech-savvy member as the *Account Manager*
- The *Manager* **purchases all the tickets** and **adds the first ticket** to their Apple Wallet
- Each member who wants a ticket on their own device must create a Fabulous Fox ticketing account
- The *Manager* **transfers tickets** to anyone who will enter the event separately **via My Account** in the The Fabulous Fox website.
